The diagram illustrates a 4-bit bus system with four signals: O1, O2, O3, and O4. O1 and O2 are active-low signals, while O3 and O4 are active-high signals. The signals are shown as rectangular pulses. O1 and O2 are asserted (go low) simultaneously, followed by O3 and O4 being asserted (go high). This sequence of operations is repeated twice. The signals are connected to a common bus line on the right.
